

2022-2023 FPA Health Policy As of August 25, 2022

Concerning ALL sickness, if you have a **fever** of 99.9 or above for greater than 24 hours without a known cause, you need a doctor's note or negative Covid test to return to school.

Regardless of vaccination status, you should isolate from others when you have COVID-19.

- You should also isolate if you are sick and suspect that you have COVID-19, but do not yet have test results.

If you test **positive** for COVID-19, you stay home for at least 5 days and isolate from others in your home. You are likely most infectious during these first 5 days. Wear a high-quality mask when you must be around others at home and in public.

- If after 5 days you are fever-free for 24 hours without the use of medication, and your symptoms are improving, or you never had symptoms, you may end isolation after day 5.
- You should wear a high-quality mask through day 10.
- If you want to test again and receive a negative test after 5 days, you may return to school mask free.

If you were **exposed** to COVID-19, you **no longer** have to quarantine if asymptomatic.

The Administration of FPA will keep you informed of any additions or modifications to this policy.
